

Vedanta commits support of 150 oxygen concentrators to Goa Govt. to combat Covid

Hands over 30 oxygen concentrators to South Goa District Hospital; to deliver rest 120 oxygen concentrators in the next 7-8 days

CM Dr. Pramod Sawant appreciates Vedanta Sesa Goa for the initiative in this time of unprecedented crisis

Panjim, 03.05.2021: Vedanta Sesa Goa Iron Ore Business has pledged to support the Goa state government in the fight against COVID-19 with 150 oxygen concentrators. Today, Vedanta Sesa Goa Iron Ore handed over 30 oxygen concentrators to South Goa District Hospital. The company will hand over the rest 120 oxygen concentrators in the next 7-8 days.

The unprecedented medical crisis created by the second wave of the COVID-19 pandemic has resulted in an exponential surge in the demand for healthcare facilities. This has led to an acute shortage in the availability of liquid medical oxygen (LMO) for the treatment of COVID- positive patients.

Vedanta Sesa Goa Iron Ore as part of its business ethos to commit, connect, care and give back to the community is playing a critical role in supporting the Goa state government's endeavour to enhance the supply of liquid medical oxygen supply in the state. In addition to the concentrators, the company has already committed supply of average 3 tonnes of liquid medical oxygen per day to the Goa state government to deal with the exponential rise in demand for liquid oxygen for medical use in the state.
